Metal Tiers: Enhanced Silver 87, and Bronze

The two options displayed below detail the options that are the lowest cost and best value for you. You can compare the benefits provided at each plan level or "metal tier."

The two best options for you are the Enhanced Silver 87 or the Bronze plans.

- Due to your income level, you qualify for the Enhanced Silver 87 plans, which provide assistance with out-of-pocket costs in addition to premium assistance. Enhanced Silver 87 plans will cover an average of 87% of costs, meaning that, on average, you will be responsible for 13% of your health care costs. Most common covered services under the Enhanced Silver Plan do not have a deductible.
- You could also select a Bronze plan. Bronze plans cover an average of 60% of costs, meaning that, on average, you will be responsible for paying 40% of your health care costs. Also, most services covered by the Bronze plan are subject to a deductible, or amount you must pay out-of-pocket before the plan will cover costs.

You can compare the charts below to see what your costs would be under each plan. It is important to understand the benefits and risks, and determine how much health care you expect to use. While the Bronze plan has the cheapest monthly premium, the Enhanced Silver Plan provides a lower risk of out-of-pocket costs, making it a better value for most people.
